CHICAGO
LAWN AND GARDEN

OTHER GRASS AND CLOVER SEEDS.

Blue Grass. There are many people who prefer this grass to all mixtures for the formation of lawns. It has a creeping habit, uniform growth, and a pleasing color. One of the most enduring grasses. 3/4 lb. 25c, 1 lb. 45c.

Red Top. This is a quick growing grass, suitable for lawns, meadows, and pastures. It thrives in almost any situation and is not seriously affected by weather influences. 3/4 lb. 30c, 1 lb. 55c.

White Clover. The most hardy of any variety of clover. It has a creeping habit and is desirable to sow on lawns or sloping ground. Indispensable to all lawns. 1/4 lb. 25c, 1 lb. 55c.

NOTICE: Prices on insecticides and Fertilizers are Subject to Change Without Notice.

Lawn Grass Seed

A RICH, velvety green lawn is easily obtained. You can have one if you use our specially prepared seed. It is made up of a number of varieties of dwarf habits.

A lawn which is produced from seed will invariably give better satisfaction than one prepared by laying down sods or turf. That made from seed will retain its verdure and velvety appearance in dry weather because the grasses in it are such will thrive under adverse conditions.

The Quantity to Sow. It is unwise to be economical in the quantity of seed used if the best results are desired. One pound will sow a plot of three hundred square feet; 4 bushels (86 lbs.) to the acre.

The Price. The price of lawn seed varies greatly according to quality. The cheap seed offered consists mostly of chaff and if used the planter will find his grass coming up in patches or very thin. If good seed is planted it will come up thick and make a good permanent lawn.

Knowing from experience of many years in both growing and dealing with the planter of seeds that the best is the cheapest in the end, our mixtures contain only seed of the highest quality.

OUR SUPERIOR PARK MIXTURE.

A combination of various native and foreign dwarf growing, fine-leaved grasses, carefully selected, and blended, with a view of producing a turf that will retain its rich green color throughout the entire season. There is nothing better than this for the establishment of a luxuriant and permanent lawn. It can be used to advantage to renovate overgrown lawns or to bring again into lawns patches of lawns which have been sown either in Spring or Fall. 1/4 lb. 25c, 1 lb. 40c, 3 lbs. $1.10, 5 lbs. $1.75.

CHOICE MIXTURE.

While containing fewer and less expensive grasses, this is a good well-balanced mixture which we do not hesitate to recommend. 1/25c, 5 lbs. $1.15.

SHADY PLACE MIXTURE.

Made up of grasses selected for locations shaded by trees or buildings. 40c, 5 lbs. $1.50.

Fertilizers

INSECTICIDES AND REMEDIES FOR PLANT DISEASES

Everyone recognizes the necessity of stimulating the fertility of the soil in some degree. On the farm this is largely accomplished by plowing under decayed manure. Concentrated fertilizers, that are inodorous, quickly applied and easy to handle are now offered.

FERTILIZERS.

Bone Meal. Ground fine. Can be used for Indoor or outdoor purposes. Stimulates lawns and pot plants. Bone Meal is the best and safest fertilizer. 5 lbs. 35c, 10 lbs. 65c, 25 lbs. $1.15, 50 lbs. $2.00, 100 lbs. $3.75.

Lawn Fertilizer. A dry odorless preparation that is pleasant to the touch. A tree from vegetable root and a product. Apply at the rate of ten pounds to 300 square feet, either in fall or spring. 5 lbs. 35c, 10 lbs. 55c, 25 lbs. $1.10, 50 lbs. $1.90, 100 lbs. $3.25.

SHEEP MANURE (Pulverized)

This is a natural manure; excellent for the soil. Strewn over and raked into the surface of the vegetable garden or placed directly in drills or hills, it promotes a mellowing Nitrogen, Potash and Phosphoric Acid, the elements which are necessary for plant production. Being in liquid form it is easily applied, and comes instantly available to plant absorption. It aids in producing extra and more flowers of better color by renewing power in the soil. It is an ideal preparation for ferns and all other house plants.

Price 25c. Directions for use with each can.
We take this occasion to extend to our many customers our heartfelt greetings and best wishes for a successful season. It is our pleasure to announce that we have brought together a collection of Seeds, Bulbs and Plants as offered herein all of which will be found to be of the highest quality. Many varieties found in the average seed catalogue have been eliminated for the reason that after years of experience have shown to possess little or no value. No mistake can be made in using those which we describe in these pages as they have been thoroughly tried and are known to be of possessing quality, soliciting an opportunity to serve you, we are willing to help you gain unailing success.

Having selected these goods with consideration and untiring effort in order to offer the best the market affords. We are willing to do all in our power to help you have a successful garden; but we give no express or implied as to description, quality production, or any other matter of the seeds, bulbs or plants we send out and will not be responsible for the crop.

Wm. Marks.

---

Selected List of Vegetable Seeds.

**ASPARAGUS SEEDS—Escarole.**
Sow thickly in early spring. Transplant in one or two years, 9 to 12 inches, in rows 3½ feet apart. Asparagus can be cut in 3 to 4 years.

The standard variety. Popular, productive, and of good quality. Pkt. 5c.

**ASPARAGUS ROOTS.**
One-year roots are ready to cut two years from planting; two and three year roots, the year following setting out.

**Prices:** Conover's Colossal, 2 year old roots, doz. 15c, 100 75c.

**ARTICHOKE**
Large Globe. Sown and grown in good garden soil, this variety will last for years. Its flower heads cooked like Asparagus are relished by many. Pkt. 5c.

**BEANS—Dwarf, Wax Podded.**

- **Bohnen.** Bäumchen-Sorten.

**DAVIS KIDNEY WAX BEAN.**

The large beans are pure white; excellent for cooking, green or dry. The pods while young are stringless, tender, and of excellent flavor, very long, straight and uniform in size and shape, of a clear, waxy white, do not discolor in canning. Pkt. 5c; per lb. 25c

**GOLDEN WAX.**
Pods flat; golden colored; beans oval, white with more or less of two shades of reddish purple visible. One of the most delicate and finely flavored, as well as early. Pkt. 5c; per lb. 25c

**PROLIFIC BLACK WAX.**
The old standard Black Wax Bush Bean. It is so good that it is worthy of special notice. The pods are round, brittle of handsome golden yellow color and of buttery flavor when cooked. Pkt. 5c

Per lb. 25c

**POLE LIMA BEANS.**

**SEIBERT'S EARLY LIMA.** In earliness, ease of shelling and quality of the green beans, this variety is far in advance of all other early Limas for either the garden or market. The vine is very productive; although the pods rarely contain more than four beans, the total yield is enormous. The green shelled beans are of immense size, tender and of finest quality. Pkt. 5c; per lb. 35c.

**DWARF LIMA BEANS.**
Busch Limas should be planted three feet apart, dropping two or three beans fifteen inches apart in the row. Cover about 1 inch deep. Dwarf Limas require no support.

**Dreer's Dwarf Lima.** Thicker pods and large thick beans, three or four in a pod. Ripens fully ten days earlier than the Pole Lima of same name. Pkt. 5c; per lb. 35c.

**BURPEE'S STRINGLESS.**

This fine bean is the only absolutely stringless green-pod bean in the market. It is the earliest and most hardy of green-pod sort. By repeated plantings pods may be had in constant succession from spring until cut off by frost. The plants are very productive, bearing profusely the beautiful green pods, which are nearly round, straight, broad, tender, brittle, of the finest flavor, flabby and entirely stringless. Pkt. 5c; per lb. 25c

**EARLY MOHAWK.**
Hardy and very early. The long, straight pod and good shipping quality make it a desirable variety for market gardeners. Pkt. 5c; per lb 30c

**LONG YELLOW SIX WEEKS.**
Early, upright in growth, with long, straight, thick pods of excellent quality. Seeds, when ripe, are olive-brown color. Pkt. 5c; per lb 25c

**IMPROVED RED VALENTINE.**
For snaps there is nothing superior to this variety among the green podded sorts, and many prefer it to the wax varieties. Vine erect, with dark green leaves; pods medium length, curved cylindrical, with crease in back, very fleshy, crisp and tender; seed long, of medium size and unsymmetrical in shape; pink, marbled with red. Pkt. 5c; per lb 25c
BEETS FOR THE TABLE—Rotkohlen.
Crosby's Egyptian. Much in demand by market gardeners for forcing and early out-of-door sowing. This beet is perfect in shape, and deepest red, almost black in color. Equally good for early bunching as well as the fall market. Its fine color and superior quality make this one of the best beets. Pkt. 5c, oz. 15c, ½ lb. 25c

Improved Crimson Globe. The best sort for general crop. In quality one of the finest, exceedingly dark, shape globular, having only one tap root. Pkt. 5c, oz. 15c, ½ lb. 25c

Mangel-Wurzel and Sugar Beets.
Mangelwurzeln und Süßkohlen

MAMMOTH LONG RED. On good soil sometimes grows eighteen inches long. Dark leaves; skin bright dark red; flesh white with veined rings of rose-pink. An excellent keeper; nutritious and milk-producing. Oz. 10c, ¼ lb. 20c, lb. 30c

KLEIN WANZLEBEN. White flesh. Contains large amount of sugar. Oz. 10c, ¼ lb. 20c, lb. 60c

BRUSSELS SPROUTS—Spössenstolz.

BRUSSELS SPROUTS. This is one of the best vegetables for winter use, producing from the axils of the leaves an abundance of sprouts, resembling small cabbages, of excellent mild flavor. Pkt. 5c, oz. 25c

CARROTS—Gelberüben.

CHANTENAY. Deep red flesh, fine grained and sugary. One of the best for home or market garden. It is early, grows about six inches long; stump rooted; always smooth. A heavy cropper. This carrot will please everybody. Pkt. 5c, oz. 15c, ¼ lb. 30c

HALF LONG SCARLET NANTES. An early stump-rooted variety about six inches long, that is valuable for table use. Flesh red, little core. Pkt. 5c, oz. 15c, ¼ lb. 30c

OX HEART, or Guernarde. Much esteemed either for family use or market. It is intermediate between the half long and horn varieties. Roots are about six inches long, cylindrical in shape and rich orange color. The flesh is fine grained, little core. Pkt. 5c, oz. 15c, ¼ lb. 30c

CORN SALAD—Korn Salat.

BROAD-LEAVED. A delicious salad, used during the winter and spring months as a substitute for lettuce, and also cooked and used like spinach. It will mature in six weeks. Pkt. 5c, oz. 10c.

CREASE—Brunnenfresser.

CREASE. A Perennial. It is ready to use very early in spring. Has the flavor of water cress. Pkt. 5c, oz. 25c.

UPLAND CRESS. Perennial. It is ready to use very early in spring. Has the flavor of water cress. Pkt. 5c, oz. 25c.

CABBAGE—Kopftüten.

EARLY JERSEY WAKEFIELD. Long recognized as the best, earliest marketable cabbage. In size, medium; in shape, pyramidal with pointed peak. Its uncommonly fine heading qualities, together with its fineness for wintering in cold frames, pleases the most critical gardeners. Our strain of seed is of superior quality. Pkt 5c, oz. 25c

SELECTED LATE FLAT DUTCH. It grows very large, is remarkably hardy, a sure header, uniform in shape, size and color. Few varieties can approach this for superior quality. Market gardeners grow this very extensively for a late crop. Pkt 5c, oz. 25c

MAMMOTH RED ROCK. By far the best, largest, and hardest heading red cabbage in cultivation; very uniform in size, weight, solidity and deep red color. The heads grow to weigh 19 or 12 pounds. Pkt 5c, oz. 30c

SAVOY or CURLED LEAVED.
The quality and flavor of these “curled leaved” Cabbages is very superior; grown in fall and allowed to be touched by frost, they are sweet, delicate and most delicious.

AMERICAN DRUMHEAD SAVOY. The best of its class for home use and market. Heads large, solid and compact. Has rich, sweet flavor of the cauliflower when cooked. Pkt 5c, oz. 25c

CAULIFLOWER—Blumentüten.

EARLY SNOWBALL. The leading cauliflower among cauliflower growers, and unquestionably the finest strain of "Snowball" cauliflower seed to be had. Heads uniform, of desirable market size and of snowy whiteness. Pkt 20c.

CROSBY'S EGYPTIAN BEET.
Celeriac Seed.

CELERIAC—Sellarie.

GOLDEN SELF BLANCHING. The best of all early self blanching varieties. First introduced in America in 1884, this is decidedly better in quality than the White Plume. It is ready for use nearly as early, blanches as easily, and is larger in size, as well as finer in quality. It is of dwarf compact habit, with thick solid heavily ribbed stalks which blanch easily to a clear waxen yellow. Pkt. 10c.

GIANT GOLDEN HEART. Large size, beautiful color, crisp and deliciously flavored. One of the best celeries for market, and for home use. Pkt. 5c.

WHITE PLUME. The peculiarity of this leading variety is that the inner leaves and heart are naturally white, so that by closing the stalks, either by tying or by drawing the soil close about the plant and pressing it together with the hands, the blanching is completed. It is the earliest Celeriac in cultivation, but will not keep longer than the holiday season. Pkt. 5c.

GERMAN CELERY or CELERIAC—Snellen Sellarie.

Produces larger turnip-like roots which keep well for winter use; it is highly esteemed either cooked for flavoring soup or sliced and used with vinegar, making an excellent salad. It is cultivated like celery, little or no earthing being required. Ready for use in October.

LARGE SMOOTH PRAGUE. Has a large smooth root, and is the finest of all celeriac. Pkt. 5c, oz. 20c.

CHARD

OR SPINACH BEET. Few people realize the great merits of this vegetable. While it is classed among beets, it makes no root whatever, the top only being used. It is cooked and served like spinach, which it resembles in taste. Pkt. 5c, oz. 15c.

SWEET CORN—Eastern. BEST VARIETIES FOR FAMILY USE.

Golden Bantam. For sweetness and richness of flavor it has no equal. It is a hardy, early maturing variety of very dwarf growth and can, therefore, be planted closer than other sorts, the ideal Corn for the home garden. Pkt. 5c, per lb. 25c

Country Gentleman. The great merit of this fine main crop Sweet Corn is its delicious quality, being the sweetest and most tender of all. The ears are medium, cob small, kernels deep; pearly white in color. It is very productive, bearing from two to four ears on the stalk. Ripens about same time as Stowell’s Evergreen. Pkt. 5c, per lb. 25c

Stowell’s Evergreen. More extensively planted than any other sort, being the general favorite with market gardeners and canners for late use. It is planted at the same time with earlier kinds it will keep the table supplied until October. Ears are of good size, grain deep, tender and sugary, remaining a long time in condition for cooking. Pkt. 5c, per lb. 25c

POP CORN

A Profitable Crop. We have choice seed. It pops large and white. Pkt. 5c, per lb. 15c.

CUCUMBER—Surfen.

This is one of the vegetables that can be grown to perfection by any one who can control a few square yards of soil that is fully exposed to the sun. Every family should be supplied from its own garden, since the fruit is so much better, when gathered fresh from the vines than it is in the more or less wilted condition in which it is found on the market.

Pick the fruit before it begins to ripen, as the vines will cease setting fruit as soon as any seed begins to mature.

LONG GREEN. Fruit from 10 to 12 inches long, dark green, firm and crisp. It is used for slicing, also for sweet pickles. Pkt. 5c, oz. 10c, ¼ lb. 40c.

CHICAGO PICKLE. This is one of the best varieties and largely used by pickle factories. The fruit is of medium length, pointed at both ends, with large and prominent spines; color deep green. Pkt. 5c, oz. 10c, ¼ lb. 35c.
VEGETABLE SEEDS

EGG PLANT—Eier Pflanze.

NEW YORK IMPROVED PURPLE. This variety is a general favorite both for market and private use. Plants, large, spreading; foliage light green; fruit very large, oval; color a splendid dark purple. Plants usually ripen four to eight large fruits. Pkt. 5c.

ENDIVE—Winter Salat.

This plant furnishes an attractive and appetizing salad for the fall and winter months, or by repeated sowing a supply may be had nearly all the year round.

GREEN CURLED. Leaves finely cut or incised, giving the plant a rich mossy appearance which is greatly enhanced when the centers are nicely blanched. Pkt. 5c., oz. 15c., ½ lb. 35c.

BROAD-LEAVED BATAVIAN. Has slightly wrinkled thick leaves. It is usually grown for use in soups and stews. Pkt. 5c., oz. 15c.

Borecole, or Kale—grün-Roßhähnchen.

The Kales are more hardy than cabbage, and are improved by frost, but the time and manner of sowing and the culture are identical with cabbage.

DWARF GERMAN, or GERMAN GREENS. A dwarf variety, rarely exceeding 18 inches in height, but spreading out under good cultivation to 3 feet in diameter; the leaves are very beautifully curled, and of a bright green. Pkt. 5c., oz. 30c.

HERBS—Kräuter.

DILL. Leaves used with pickles, seeds for flavoring soups and vinegar. Pkt. 5c., oz. 10c., ½ lb. 30c.

SAGE. Leaves are used in stuffings and sauces. Pkt. 5c.

SAVORY, SUMMER. Used for seasoning. Pkt. 5c.

THYME. For seasoning. Pkt. 5c.

LAVENDER. Its flowers are used in the manufacture of oil and distilled water. Pkt. 5c.

MARJORAM, Sweet. Used for seasoning. Pkt. 5c.

WORMWOOD. Beneficial for poultry. Pkt. 5c.

Kohl-Rabi or Turnip-Rooted Cabbage—Kohlrabi.

A vegetable of the cabbage tribe, with a thick stem; sweet and delicate when cooked.

EARLY WHITE VIENNA. Flesh is white. Pkt. 5c.

EARLY PURPLE VIENNA. Rich purple. Pkt. 5c.

LETTUCE—Blätter-Salat.

CABBAGE OR HEADING VARIETIES.

BIG BOSTON. The most popular and satisfactory head lettuce with market gardeners. It forms a fine head, is tender and crisp, and is very slow to run to seed. Outer leaves are light green, and the inner ones are bright, creamy yellow, of a very fine flavor. Altogether, we recommend it as being the best head lettuce for general use. Pkt. 5c., oz. 15c., ½ lb. 35c.

IMPROVED HANSON. For outdoor culture there are none more reliable than this. In rich ground, well cultivated, the heads grow to resemble small cabbages. Outer leaves green, white within, having no bitter taste. Pkt. 5c., oz. 15c., ½ lb. 35c.

LETTUCE—Blätter-Salat.

BLACK-SEEDED SIMPSON. Among the many varieties of Curled or Leaf Lettuce, there is no one better fitted for the general use of market gardeners and the private cultivator than Black-Seedled Simpson. It is suitable for growing under glass as well as for early outdoor planting. Forms a compact mass of thin leaves which are tender and of excellent quality. By far the most popular Lettuce with the market gardeners of Chicago and elsewhere. Pkt. 5c., oz. 15c., ½ lb. 30c.

PRIZE HEAD. For general use no Lettuce has ever given such universal satisfaction. It forms a large head of loose leaves, bright green in color, tinged at the edges with red; very crisp and tender, and of excellent flavor, and has the faculty of keeping its good qualities throughout the entire season. Pkt. 5c., oz. 15c., ½ lb. 30c.

COS LETTUCE, Trianon. These Lettuce make long, narrow, upright heads; sweet and tender. Pkt. 5c., oz. 15c., ½ lb. 30c.

Kolrabi-Rooted or Turnip-Rooted Cabbage—Kolrabi.

A vegetable of the cabbage tribe, with a thick stem; sweet and delicate when cooked.

EARLY WHITE VIENNA. Flesh is white. Pkt. 5c.

EARLY PURPLE VIENNA. Rich purple. Pkt. 5c.

LETTUCE—Blätter-Salat.

CABBAGE OR HEADING VARIETIES.

BIG BOSTON. The most popular and satisfactory head lettuce with market gardeners. It forms a fine head, is tender and crisp, and is very slow to run to seed. Outer leaves are light green, and the inner ones are bright, creamy yellow, of a very fine flavor. Altogether, we recommend it as being the best head lettuce for general use. Pkt. 5c., oz. 15c., ½ lb. 35c.

IMPROVED HANSON. For outdoor culture there are none more reliable than this. In rich ground, well cultivated, the heads grow to resemble small cabbages. Outer leaves green, white within, having no bitter taste. Pkt. 5c., oz. 15c., ½ lb. 35c.

LETTUCE—Blätter-Salat.

BLACK-SEEDED SIMPSON. Among the many varieties of Curled or Leaf Lettuce, there is no one better fitted for the general use of market gardeners and the private cultivator than Black-Seedled Simpson. It is suitable for growing under glass as well as for early outdoor planting. Forms a compact mass of thin leaves which are tender and of excellent quality. COS LETTUCE, Trianon. These Lettuce make long, narrow, upright heads; sweet and tender. Pkt. 5c., oz. 15c., ½ lb. 30c.
MUSHROOM SPAWN
Champignon Brut

London Flag Leek

Mushroom Culture in Brief.
Two or three weeks before the bed is to be made, collect a quantity of horse manure, free from straw, and mix an equal amount of loam from an old pasture with it. Place it under cover, turning it over once or twice a week until the fiery heat has been exhausted.

When the manure is in condition to be made up, lay out the bed, say three feet wide, ten feet long, and make the bed in layers of about one foot deep; press it down firmly as the process of building goes on. When the bed has been made some time, say a week or two, the heat is sufficiently declined to a temperature of about 65 or 75 degrees, the spawn may be put into it. Break the spawn in pieces two inches square, and put them six inches apart, all over the bed, then cover the bed with two inches of rich soil, not too wet or overdry. Cover the bed with a foot of dried straw or hay; examine once a week to see if the manure is not heated while in this condition: if so, it will destroy the spawn, and necessitate spawning a second time. If everything goes on well, you may expect Mushrooms in about five or six weeks. It comes in bricks weighing about twenty ounces each. One brick will spawn about eight square feet of bed. 

Prices per brick 25c

MUSK MELON—Judge-Melonten.

ROCKY FORD. Nearly every leading hotel and restaurant in America uses large quantities of this famous melon which is just the right size to serve in halves. The ripe melons are beautifully netted and ribbed. Solid green flesh, sweet and melting. Pkt. 5c, oz. 10c, ¼ lb. 30c.

PAUL ROSE. A cross of the Osage and Netted Gem; about ten days earlier than the former. Fruit oval, with very small seed cavity. Red fleshed. A good shipper, especially in baskets. Pkt. 5c, oz. 10c, ¼ lb. 30c.

OSAGE or MILLER'S CREAM. The fruit is medium-sized, oval, somewhat resembling a cocomut. Skin, dark green, slightly netted and of a rich orange color where the melon lies on the ground. The flesh is thick, salmon-colored, and in quality is hard to beat. Pkt. 5c, oz. 10c, ¼ lb. 35c.

OKRA—Ela.

Sow after weather becomes warm, in rows three feet apart, two feet apart in the rows. Will succeed in any good garden soil. The young green pods make a healthful and nutritious soup, and when pickled are a fine salad.

IMPROVED DWARF. A distinct early variety. Pods comparatively short. Pkt. 5c, oz. 10c.

ONION SEED—Zwiebeln.

YELLOW GLOBE DANVERS. Globe shaped of medium size; the skin is a beautiful silvery yellow color. Comparatively mild and well flavored. The standard yellow onion for Market. Pkt. 5c, oz. 20c ¼ lb. 50c

WHITE GLOBE. One of the most beautiful globular, mild flavored onions. A favorite for market; salable everywhere. Of very large size, and of fine quality. Pkt. 5c, oz. 25c ¼ lb. 75c

LARGE RED GLOBE. Of medium size, spherical with small neck. One of the most handsome onions in cultivation. It is a splendid keeper and an onion that no one will err in planting. Pkt. 5c, oz. 20c ¼ lb. 60c

ONION SETS—Zwiebel-Schlingen.

Bottom Onion Sets produce Onion bulbs much earlier than can be done by sowing the seed and allows the planter the early high market prices and permits the sowing of another crop on the land the same year. For green or bunch Onion sets produce a crop in half the time it takes to raise these from seed.

ONION SET PRICES are subject to market changes which vary from day to day. Latest values on request.
VEGETABLE SEEDS

CHAMPION MOSS CURLED.

This is a fine prize winning English variety, entirely distinct. It is a very quick, robust sort, making remarkably handsome, compact plants, which have leaves so crumpled and curled as to give them the appearance of tufts of finely curled moss. The color is rich green, making it the very best parsley for garnishing. Its flavor is exceedingly pleasant and aromatic, so that for flavoring soups, dressings, etc., it is unsurpassed. Pkt. 5e, oz. 10e, ¼ lb. 30e.

HAMBURG ROOTED or GERMAN PARSLY. The root resembles a small parsnip and is the edible part of this sort; extensively used for flavoring soups. Pkt. 5e, oz. 10e, ¼ lb. 30e.

PARSLEY—Petroselie.

CHAMPION MOSS CURLED. Very slow to run to seed and quite hardy. May be grown in pots or window boxes. Pkt. 5e, oz. 10e, ¼ lb. 30e.

CHINESE GIANT. The best, mildest and largest red pepper. Fruit of bright scarlet color when ripe. Excellent for eating and for stuffing. Pkt. 10c.

NOCERA. Sweetest and mildest of all peppers. Can be picked from plant and eaten as one would eat an apple. It is an early fruiting variety and an abundant yielder. The plants make a very handsome appearance in any garden with their showy scarlet fruit, which attains to a large size. Be sure to plant this pepper. Pkt. 10c.

LARGE BELL, or BULL NOSE. An old, standard variety, of vigorous growth and productive. Fruit of good size, dark green turning to scarlet at maturity; mild, pleasant flavor. Pkt. 5e.

LONG RED CAYENNE. Slender fruit; green turning to scarlet. Very pungent and hot. Pkt. 5e.

PUMPKIN—Kürbis.

SUGAR PIE PUMPKIN. One of the very best of all Pumpkins for pies. The fruit is small to medium in size; flesh solid and fine grained; sweet and sugary. The seed cavity is small. A splendid keeper. Pkt. 5e, oz. 10e, 2 oz. 15e, ¼ lb. 25e.

PARSNIP—Radjinalen.

IMPROVED GUERNSEY. This is a good, half-long variety, having smooth roots. It is of good quality and recommended for the family garden. Pkt. 5e, oz. 15e, ¼ lb. 50e.

GARDEN PEAS—Erbsen.

THREE BEST PEAS FOR TABLE USE.

AMERICAN WONDER. Vigorous, productive vines with a luxuriant foliage, and producing the leaves on one side of the stalk, and growing from 9 to 12 inches high. On account of its dwarf habit of growth it is very desirable for private garden use. Pods are light-colored, straight, round, about 2½ inches long, and blunt at the end. Pkt for picking 55 days from planting. Seed is wrinkled, green, medium in size and square at the ends. Per lb. 30c.

NOTT’S EXCELSIOR. One of the most valuable of Peas. Surpassing in earliness, yield and quality. This is usually ready for the table in 40 to 45 days from planting. It grows about 14 inches high. Of vigorous constitution and wonderfully productive. Lb. 30e.

DWARF TELEPHONE. Vines, 18 to 20 inches high, with rather coarse foliage, medium light green, bearing pods, broad, straight, and about 4 inches long. Pale green in color and well-filled with peas of excellent flavor. Ready for picking from 42 to 48 days from planting. Seed, pale green; large, much wrinkled. Per lb. 30e.

SUGAR or EDIBLE PODDED-PEAS. When cooked, they are equal to the best snap beans. Being hardy, can be planted early in spring. Of strong, upright habit, growing about 12 to 18 inches high. The pods are gathered while young and boiled whole. Pkt. 5e, lb. 30e.

PEANUTS.

These can be easily grown and a supply on hand will afford much satisfaction to the younger members of the family.

SELECTED VIRGINIA. A fine, productive strain, selected especially for seed purposes. Lb. 25e.

PARSLEY—Petersilie.

CHAMPION MOSS CURLED. Very slow to run to seed and quite hardy. May be grown in pots or window boxes. Pkt. 5e, oz. 10e, ¼ lb. 30e.

CHINESE GIANT. The best, mildest and largest red pepper. Fruit of bright scarlet color when ripe. Excellent for eating and for stuffing. Pkt. 10c.

NOCERA. Sweetest and mildest of all peppers. Can be picked from plant and eaten as one would eat an apple. It is an early fruiting variety and an abundant yielder. The plants make a very handsome appearance in any garden with their showy scarlet fruit, which attains to a large size. Be sure to plant this pepper. Pkt. 10c.

LARGE BELL, or BULL NOSE. An old, standard variety, of vigorous growth and productive. Fruit of good size, dark green turning to scarlet at maturity; mild, pleasant flavor. Pkt. 5e.

LONG RED CAYENNE. Slender fruit; green turning to scarlet. Very pungent and hot. Pkt. 5e.
VEGETABLE SEEDS

SPINACH—Spinat.

WHITE TIPTED RADISH. [Image]

RHUBARB ROOTS—Rhabarber.
LINNAEUS. The earliest variety grown; desirable for market or family garden. Extra large clumps. Each 25c.

SORREL—Sauerampfer.
Of the easiest growth. Sorrel is cultivated for its leaves, which possess a very fine flavor; boiled and served like Spinach. It also makes a delicious soup. Pkt. 5c, oz. 20c.

SPINACH—Spinat.
THICK LEAVED ROUND. One of the best market sorts for spring or autumn sowing. Oz. 10c, /4 lb. 15c, lb. 50c.

VICTORIA. This variety is an acquisition to the list of Spinach; it matures later but is of remarkably fine texture, of the deepest green, heavily crimped thick, fleshy leaves, deep red stem. It is now grown extensively by the truckers of our markets. Pkt. 5c, oz. 10c, 15c.

GIANT SUMMER CROOKNECK. Twice as large as the ordinary Summer Crookneck, much more warty and several days earlier. Fruit, golden yellow. Pkt. 5c, oz. 10c.

GOLDEN CUSTARD. It grows in bush form. Color, rich golden yellow. A valuable variety of superior quality. Pkt. 5c, oz. 10c.

BOSTON MARROW. Early fall sort; rich orange color, excellent flavor. Pkt. 5c, oz. 10c.

HUBBARD. The favorite winter squash. Color, dark green; shell, extremely hard; excellent keeper. Pkt. 5c, oz. 10c.

SEED POTATOES
Choice Stock Grown Expressly for Seed Purposes.

RED RIVER EARLY OHIO. Probably the most popular early potato in the country. Tubers smooth, oblong in shape; resisting scab and dry weather well and bearing the ever-sized, abundant tubers compactly in the hill. A popular favorite.

RADISH—Radieschen.
Pkt. 5c, oz. 10c, /4 lb. 10c. lb. 35c.

FRENCH BREAKFAST. Fine for open ground or forcing. Value for its excellent quality and fine color, which is a beautiful scarlet on the body and white at the extremity. Flesh, white, tender and mild. French breakfast Radish

SCARLET TURNIP WHITE TIPPED. With Chicago gardeners this is by far the most popular early Radish or for planting in succession. Tops and roots are small, skin bright scarlet, shaded to white at the tip; flesh, white, mild and crisp. We have an excellent strain of seed.

EARLY SCARLET GLOBE. A desirable sort for hotbed forcing and outdoors; very early; flavor, mild, crisp, juicy and tender; top small; will stand heat without becoming pithy. One of the best selling and most attractive radishes, on account of its bright scarlet color and handsome shape. Is ready in twenty-eight days.

WHITE STRASBURG. One of the best of the later sorts, of handsome oblong shape, tapering to a point. Both skin and flesh are pure white.

LONG SCARLET SHORT TOP. The roots grow half out of the ground, are uniform in shape, smooth, and bright red in color.

LONG BLACK SPANISH. Black skin. Flesh white, excellent flavor. One of the hardest and finest.

Globe Radish

VICTORIA SPINACH.

IMPROVED BEAUTY. A favorite both for the home market or shipping purposes. Medium early. Fruit round, smooth, crimson, with purplish tinge. Pkt. 5c, oz. 30c.

ACME. Improved Strain. Ripens early; of medium, uniform size; glossy red with purplish tinge; round and smooth, free from cracks. An excellent Tomato for market gardeners' use, as it ships well. Pkt. 5, oz. 35c.

DWARF CHAMPION. Dwarf and compact in growth, the plants grow stiff and upright, with foliage unlike most others. Fruit in form and color like Acme. Recommended for the home garden. Pkt. 5c, oz. 35c.

YELLOW PLUM. A small yellow variety, of handsome appearance and fair quality. Pkt. 5c.

TURNIP—Weisse Rüben.

PURPLE TOP WHITE GLOBE. A fine table turnip. It is an early and heavy cropper as well as a good keeper. The bulb is a very handsome globe, and is especially in demand among market gardeners. Pkt. 5c, oz. 10c, /4 lb. 30c.

SKIRVING'S PURPLE TOP. Flesh yellow. Good keeper. Pkt. 5c, oz. 15c, /4 lb. 35c.
SELEcTED FLOWER SEEDS.

AGERATUM.
Plants that grow well anywhere. The tall-growing varieties are effective when mingled with Alyssum, Candytuft and similar plants. The dwarf sorts make excellent borders. They bear clusters of feathery flowery all season. Dwarf blue. Pkt. 5c.

AMARANTHUS Caesius.
LOVE-LIES-BLEEDING. Of rapid growth, easy culture, and ornamental when grown among other plants. Tricolor (Joseph’s Coat). Pkt. 5c.

ANTIRRHINUM (Snapdragon).
A border plant having dark glossy leaves, and curiously shaped, showy colored flowers with spotted throats. Our list embraces the best of the giant-flowered, improved strains. Though perennial, they blossom the first year, if seed is sown early. Slightly covered with leaves, they withstand our winters. Dwarf Mixed. 5c.

It is unnecessary to dwell on the great beauty of these popular favorites, as they are appreciated by every one. Asters are annuals, and they are sufficiently hardy to endure a little frost without injury.

ASTERS.

The form of the flowers, which are borne upon long stems, places this class of Asters as among the very best late-blooming varieties for cut flowers. Height, 2 feet. White, Pink, Lavender, Crimson, and Mixed. Pkt. 10c.

SEMPLE’S LATE-FLOWERING BRANCHING.
The flowers are of extraordinary size—much larger than other varieties—and stand erect on long, graceful stems, well above the foliage; flower stems 15 to 20 inches long. Vick’s White. Vick’s Mixed. Pkt. 10c.

CRIMSON GIANT. A splendid upright-growing sort, producing very large, well-formed dark crimson flowers. Its brilliancy of color and upright habit make it desirable for garden culture. Pkt. 10c.

CREGO. The form of the flower is similar to that of the Comet class, but much larger. They are fluffy and graceful. In bloom from mid-August until fall. This Aster is a universal favorite both with florists and private gardeners. Mixed. Per Pkt. 10c.

MIXTURE OF ASTERS.
Made of the best varieties suitable for cut-flower purposes, principally of white, pink and the brightest red, together with a small proportion of blue and purple.

Asters, tall varieties mixed, Pkt. 5c.
Asters, dwarf varieties mixed, Pkt. 5c.
FLOWER SEEDS

**ALYSSUM—**Little Gem.

**SWEET ALYSSUM.**
Used chiefly for edging beds, and in window boxes. Its fragrant white flowers are prized for bouquets. The blossoms are produced all summer. Six inches. **Pkt. 5c.**

**ALYSSUM SWEET, LITTLE GEM.** Of dense growth and very dwarf—four inches. Pure white flowers, fine for edgings. **Pkt. 5c.**

**AQUILEGIA (Columbine).**
Well-known and favorite plants for the garden border; especially suitable for shady places. Are easily grown from seed, and soon form large clumps. Flowers are beautiful, and produce profusely in May and June. **1 to 2 ft.** H. P. **Double, mixed colors. Pkt. 5c.**

**BALSAM (Lady Slipper).**
The Balsam is a native of India. It loves rich soil, hot sun, and plenty of water. Sow the seed in window boxes or hotbeds early, or in the open air in May and transplant when two or three inches in height. Stimulate by weekly applications of manure water.

**Double Camelia-Flowered Balsams.**
The delicate flowers of waxy texture are borne along the stems among the leaves as shown in the illustration. The seed we offer can not be excelled for quality.

**Double Balsam, Mixed.**
**Pkt. 5c.**

**CARNATION PINKS.**
MARGARET CARNATIONS. Begin flowering in a few weeks from time of sowing. They produce on long stems an abundance of large beautifully fringed fragrant flowers, white, crimson, striped, etc. **Margaret, mixed colors. Pkt. 5c.**

BARNARD'S CARNATION MIXTURE. Contains seeds of all Carnations which bloom the first season after sowing. A packet, sufficient for a large bed. Immense double flowers. **Pkt. 10c.**

**CANTERBURY BELLS.**
CUP AND SAUCER. The flowers differ from the ordinary type in having an extra large calyx of the same color of the flower, giving the appearance of a cup and saucer. In bloom for weeks during early summer. **Mixed. 5c.**

**CALLIOPSIS (Also called Coreopsis).**
Showy, beautiful, free-blooming plants, producing large bright flowers of rich and charming colors throughout the entire summer. Mainly hardy annuals. 1 to 2 feet. **Best Mixed. Pkt. 5c.**
FLOWER SEEDS

CANDYTUFT.
A dwarf annual of the easiest culture; free-blooming, showy and useful for beds, borders and edgings. Sow seeds where plants are to bloom, in rows 6 or 8 in. apart, thinning out to afford plenty of room, as they branch quite freely. Height, 1 foot. Mixed. Pkt. 5c.

Giant Hyacinth Flowered Candytuft. Bears bold, snow-white flowers, especially if the seedings are transplanted and allowed to spread. Plants branch freely, making them desirable for filling borders. Splendid cut flowers. Pkt. 5c.

Plumed Cockscomb.
Ostrich Feather. Grows in pyramid form. Its flower sprays resemble plumes. They are orange and scarlet in color. Mixed. Pkt. 5c.

COSMOS.
Plants 4 to 6 feet high, with delicate, feathery foliage. The pretty flowers produced from September until fall, are of shades of rose, red and also pure white. Excellent for cutting. Seed sown outside in May will flower by September. Early Flowering. Mixed. Pkt. 5c.

CYPRESS VINE.
A handsome climber that will run 15 feet or more during the season. Should be planted by the side of a trellis, tree or stakes. Its beautiful dark-green foliage and star-shaped flowers in clusters are a mass of beauty all summer long. Pkt. 5c.

ANNUAL CHRYSANTHEMUMS
Summer blooming border plants of compact, thrifty growth. 1 to 1½ ft. high, producing large blooms 2 inches across, from July until frost. Extensively grown for cut flowers. They are partial to a little shade. Sow seed in the open where plants are to stand.

Double, Mixed. This mixture contains all the most desirable colors, from white to deep orange. Pkt. 5c.

HYBRID COLEUS
Foliage plants of much beauty. Easily grown from seed. They are popular for bedding and pot culture. Seeds sown early in the spring will produce fine plants for outdoor planting. Mixed. Pkt. 10c.

SILVER-LEAVED CENTAUREAS or "DUSTY MILLERS"
These are planted for bedding or borders, not for flowers. Pkt. 5c.

COBAEA SCANDENS.
Magnificent, rapid-growing annual climber with large bell-shaped purple flowers, adapted for outdoor growth in summer, also for the house and greenhouse. A thrifty plant will often grow 20 to 30 feet in one season. The flat seeds should be planted edge down to insure germination. Give very little water at first. Cobaenas Scandens. Purple. Pkt. 5c.

DIANTHUS or PINKS.
A magnificent genus, embracing some of the most popular flowers in cultivation, producing a great variety of brilliant colors and profusion of bloom. The hardy biennials, or Chinese and Japanese varieties, bloom the first season, the same as hardy annuals; height, 1 foot. The hardy perennial varieties are very fragrant and of easy culture for the garden or greenhouse.

Double Annual Pinks. All these varieties bloom profusely and make splendid cut flowers for bouquets, having stout, strong stems. Double, Mixed. Pkt. 5c.

DOUBLE DAISY (Bellis Perennis)
Hardy biennial; usually sown in July or August and transplanted in fall. Early sown seed will bring flowers in autumn. Double, Mixed. Pkt. 5c.

ESCHSCHOLTZIA.
(California Poppy)
A useful annual, especially valuable for growing in flower beds and masses. Sow where plants are to bloom. Bright, showy flowers and feathery foliage. Valuable for cut flowers. The yellow varieties make a fine combination when placed with blue flowers—Larkspur, Corn Flowers—in a bouquet. Mixed. Pkt. 5c.
EVERLASTING FLOWERS.

Everlastings, so called, take their name from the fact that their flowers, cut when in full bloom and dried in the shade, retain their form for years thereafter. Except Gomphrena, which is tender, requiring heat to start into growth, all may be sown out of doors in any good garden soil.

Gomphrena, red, clover-like heads.
Helichrysum, mixed, these flowers can be dyed to any desired color. Splendid for bouquets. Pkt. 5c.

GAILLARDIA (Blanket Flower)
These bear both single and double flowers in scarlet, yellow, blended and shaded, all summer long. Excellent cutting. Double, Mixed. A. Pkt. 5c.

HELIOTROPE.

Helichrysum.

ICE PLANT.
A singular looking, tender annual, with thick fleshy leaves that have the appearance of being covered with crystals of ice. Pkt. 5c.

HYacinth BEAN.
A fine climber with clusters of purple or white flowers followed by ornamental seed pods. Tender annual; growing from 10 to 50 feet high. Mixed. OZ. 15c. Pkt. 5c.

ORNAMENTAL GOURDS.
Handsome climbers of rapid growth. Very useful for covering fences and other unsightly places, producing fruit of peculiar and various forms which, if allowed to ripen on the vines, can be kept for months as curiosities. 5c.

KoCHIA TRICOPHILA.
A pretty half-hardy annual 2 to 3 feet in height, which grows into a perfect pyramidal-shaped cypress-like bush with feathery, light-green foliage, deepening as the season advances until it becomes a lovely crimson hue about September. Excellent for edging or hedging. Pkt. 5c.

KUDZU VINE (Jack and the Bean Stalk)
An extremely fast growing, hardy vine. Its large, bright-green leaves make dense shade. Bears rosy-purple, pea-shaped flowers toward the end of August. Thrives anywhere. Pkt. 5c.

LOBELIA.
Little, round, compact plants, 4 to 6 in. high, forming little mounds of bloom; splendid for hanging baskets; also for edgings or flower beds. T. A. Crystal Palace Compacta. Deep blue, splendid bedder. Pkt. 5c.

HOLLYHOCKS.
They require a dry, deep, rich soil to successfully stand our winters; wet, heavy soils are sure death to them. 6 ft. H. P. Mammoth Allegheny. Double and semi-double fringed flowers. Pkt. 5c.

HELIANTHUS.
The Helianthus, or Sunflower, is well known. Many improvements have been made upon it, the newer varieties being now considered indispensable for cut flowers. In bloom from June until frost. 3 to 4 feet. M. A. MULTIFLORUS. Forms a dwarf plant. Each branch carries double golden-yellow flowers. Pkt. 5c.
LARKSPUR.
ANNUAL VARIETIES.
These include the Rocket sorts, which should be set 5 to 6 in. apart, and the branching kinds which require 2 feet apart. They are among the most showy, graceful and effective plants. Handsome, feather-like foliage and long spikes of lovely flowers—white, pink, blue and violet. Fine for cutting. In bloom July to October. Prefer cool, moist soil. Dwarf Rocket, mixed. Pkt. 5e.
Moschatus (Musk Plant). Useful for hanging baskets. Small yellow flowers. The foliage emits a strong, musky perfume.
Pkt. 5e.

MIGNONETTE, MACHET.
Whether for growing in pots or out of doors this fine Mignonette stands preeminent, either in the way of handsome foliage, nor in the size of flowers can any of the other sorts approach it. In the garden it blooms until frost. Florists grow it all the year round.
The plants are dwarf in habit; the flowers are three times as large as ordinary Mignonette. They have a fragrance most delightful.
Machet. Pkt. 5e.

MARIGOLD.
Marigolds are among the easy plants to cultivate. They make a splendid show in the garden from June until frost. African varieties grow tall. Their flowers are large and all of one color. French varieties are of dwarf habit and small flowered: some have handsomely striped or gilt-edge petals.
Double African, mixed. Pkt. 5e. French Marigold. Pkt. 5e.

MARVEL OF PERU, or FOUR O'CLOCKS.
This is another good old fashioned flower, bearing hundreds of flowers during the season, of white, yellow, crimson and violet, some varieties combining two or more of these colors in spots, flakes and splashes in such manner as to give the flowers a most bizarre effect.
Four O'Clocks, Mixed.
Pkt. 5e, oz. 10c.
½ lb. 30c.

MOON FLOWER.
Tall-growing annual climbers, related to the family of Morning Glories. As Moonflower plants have dense foliage, they are useful to cover trellis work, verandas, etc. Plant seeds out-of-doors when warm weather sets in. Pkt. 5e.

MORNING GLORIES.
Rapid-growing annuals, useful for covering arbors, porches and trellises. The foliage is pretty and every morning the vines are clothed with showy flowers in a variety of colors. Sow where plants are to bloom, as they do not transplant well.
Morning Glory. Mixed Colors.
Oz. 10c. Pkt. 5e.

Japanese Morning Glory.
Imperialis Japonica. From Japan. Distinct strain, embracing varied types of foliage, combined with immense size of flowers and wonderful variety of colorings. Pkt. 5e, oz. 15e.
FLOWER SEEDS

NASTURTIUMS

Dwarf Varieties 1 ft. There are few flowers that can compare with Nasturtiums in richness and variety of color, freedom of bloom, ease of culture and general usefulness. They are suitable for bedding and edging, grow quickly, thrive in the poorest soil and furnish the greatest abundance of long lasting, sweet scented cut flowers. Pkt., 5c; oz., 10c; ½ lb., 30c.

Tall or Climbing Varieties. The tall sorts are luxuriant climbers for verandas, trellises, fences, etc. They are especially adapted to the covering of unsightly railings and to trail over rough ground, their flowers are generally larger than those of the dwarfs. The seed pods can be gathered while green and tender for pickling. Pkt., 5c; oz., 10c; ¼ lb., 30c.

PANSY

By hybridization and selection skilled specialists have greatly improved the Pansy, so that a new strain known as Giant Flowered Pansies has been developed. This, too, is constantly being improved upon by added colors to the extremely large flowers. In size the blooms are marvelous, some being four inches in diameter; in beauty their magnificence is unsurpassed; in colorings they are superb and incomparable. Price per Pkt. 10c.

Florists' Mixture. It contains seeds of all the best Pansies, including the newer varieties. A bed grown from this seed will give you a grand display. It is the best Mixture that money can buy. Each, per Pkt. 5c.

PHLOX

The colors range from purest white to deepest blood-purple or crimson. Seed may be sown in the open ground anytime after danger from frost is past, or in the hotbed earlier, and transplanted. The seedlings should be set out about a foot apart; if too thick, mildew attacks them.

Phlox Drummondii. The old fashioned favorite variety, mixture contains all colors. Pkt., 5c.

Large Flowering Phlox. The large flowering Phloxes show decided improvements in size, shape and color over the ordinary Drummondii class. The flowers are round, the petals overlapping. 1 ft. H. A. Mixed Pkt. 5c.

Dwarf Phlox. The little bushy plants rarely grow over eight inches high. Throughout the entire season they are full of flowers. They are recommended for culture in pots, beds, or edgings of borders.

Mixed. Pkt. 10c.

POPPIES

These old-time-favorite flowers have been greatly improved in late years. During the blooming period few, if any, will give such a wealth of color. Annual sorts should be sown where to bloom, as they do not bear transplanting. Double Poppies, mixed, Pkt. 5c.
PORTULACA ROSE MOSS

This plant will grow and bloom profusely in a dry, hot situation, where almost any other plant would soon die. Easily transplanted. In sowing mix the seed with dry sand to insure an even distribution. Sow in May when the ground is thoroughly warmed through.

Single, mixed, pkt., 5c  Double, mixed, pkt., 5c

PETUNIAS.

In some strains the flowers are very large, measuring four or five inches across; in others, they are deeply fringed; still others have star-like markings radiating from the throat and extending nearly or quite to the outer margin of the blossom; again others have full double flowers.

**Giant Double Petunias.** The full, double petunias do not produce seeds. To procure double flowers one must use the seeds saved from single flowers which have been carefully fertilized by hand with pollen from the double ones.

**Mixture of Double Petunias, in all shades known, Pkt., 25c**

**Bedding Petunias.** Dense, bushy little plants, only about 8 inches high; the flowers, while not large, remain boldly expanded, and in their profusion fairly hide the plants for months; beautiful for garden beds, borders and edgings, and also beautiful subjects grown in pots.

Per Pkt., 5c.

RICINUS.

(Caster Oil Plant)

Rapid-growing plant with palmlike foliage and showy fruits. Fine for center plants in beds of Cannas, etc. 6 to 15 ft. H. H. A.

**Zanzibarensis.** 15 ft. Leaves vary in color from light green to purplish red. Pkt, 5c.

SCABIOSA (Mourning Bride)

The Scabiosa is an old favorite, and of late years has been greatly improved. The flowers are borne on long wiry stems, in white, yellow, pink, scarlet, crimson and maroon. Beautiful in the garden, and excellent for bouquets. 12 to 18 inches high. H. H. A.

Dwarf double mixed, pkt., 5c.

SWEET PEA

Seeds should be sown as early as possible, in drills 6 inches deep. At the time of planting, cover with 1 inch of soil only, and fill in the drill as the young plants grow, taking care not to cover the top of the plants. A deep rich soil and a sunny situation is best suited for their needs.

ROYAL MIXTURE.

There are pure whites and white striped with other colors, fiery scarlets, blues, steel and purple, pink, all shades; orange, yellow, so many we cannot specify.

Pkt. 5c; oz. 10c; ½ lb. 25c.

**Mixture of “Spencer” Sweet Peas**

Their grand flowers with their charmingly waved petals are borne in clusters of three or four, and sometimes more, on one stem and make grand cut flowers for vases, etc. Their delicate coloring and fragrance cannot be excelled and scarcely equaled by any other flower. Pkt. 5c, oz. 15c, ½ lb. 25c.

SWEET WILLIAM

(Dianthus barbatus). The plants produce a succession of flower clusters, thus affording splendid bloom for several weeks. The colors are exceedingly varied, ranging from white through many shades of lilac, red, carmine, crimson, maroon to nearly black, usually two shades to each plant.

Packet 5c.
SCARLET SAGE (Salvia.)

The Salvia Splendens, or scarlet sage, is a standard bedding plant that keeps the garden bright with color until late in autumn. This plant lends itself to many uses; it makes a good pot plant, does well in window boxes, and is useful for cutting to give color. Its best use, however, is as a hedge or border plant, where long broad bands of intense color are desirable.

Coccinea, scarlet dwarf. Pkt. 5c.

THREE NEW SALVIAS.

Those who have never grown the more recent introductions in Salvia have little conception of the remarkable improvements achieved by skilled hybridizers.

Fireball. A dwarf, early flowering sort, having very erect spikes of brilliant scarlet flowers a foot or more in length. When fully developed, the dark-green foliage is almost entirely hidden by the great mass of bloom. Recommended for pot culture and for bedding. Pkt. 15c.

Zurich. Said to be the best of the Scarlet Sages. It is more compact than Fireball, somewhat earlier, and blooms with equal freedom. As it grows only a foot high, it is suitable for pot culture. Pkt. 20c.

STOCKS, or LEVKOYEN.

These are among the best and most popular of the garden favorites. In brilliancy of color and general effect they are unsurpassed. They are equally fine for bedding, borders, massing or for pot culture. They are very thirsty plants and must be watered in dry weather. They produce blossoms in all shades of crimson, rose, lilaec and white, and yield a delicious odor. Large-Flowering, Pkt. 10c.

SALPIGLOSSIS.

Very showy bedding or border plants with richly colored, funnel-shaped flowers which are purple, scarlet, crimson, yellow, buff, blue or almost black, beautifully marbled and penciled. The seed may be sown indoors by the middle of March, or later, or may be sown outdoors in early spring; useful for cutting. Blooms from August to October. Half hardy annual; about two feet high. Mixed, Pkt. 5c.

WILD CUCUMBER.

This is the most rapid growing vine we know of. It will reach a height of 30 ft. in one season. To cover a pillar or trellis or to embellish an ungainly tree trunk, fences, unsightly buildings, there is nothing so completely fills as does this. It is thickly dotted over with pretty, white, fragrant flowers, followed by quantities of ornamental and prickly seed pods. Pkt. 5c, ½ oz. 15c.

WALLFLOWER, Goldlack.

Wallflowers should be better known. Their adaptability for pot culture and out-door bedding and their peculiarly sweet odor, should win favor. They are easily grown and last long as cut flowers. Not hardy in the northern states, should be wintered over in cold frames. Double mixed, 10c.

SENSITIVE PLANT.

Interesting plant with pinkish-white flowers. Its fern-like leaves are extremely irritable, closing and drooping when touched. Pkt. 5c.

VERBENA.

One of the most popular of bedding plants, easily grown from seed, producing stronger, more vigorous and better plants than from cuttings. Start seed in the early spring, in the house or under glass, and transplant where they are to bloom, after three or four inches of growth have been made. Mammoth, mixed. Pkt. 10c.

New Dwarf Verbena. The best for bedding and edging. Mixed, Pkt. 5c.
HARDY PERENNIAL PLANTS.

HARDY PERENNIAL PLANTS

The ever increasing demand for Hardy Perennial Border Plants is the very best evidence of the beauty and value of these plants; and the fact that they resist the weather in which they were planted, they become a lasting pleasure. We have carefully selected the following, which are the best, of all them, in addition to their great beauty, being especially those which bloom during the early part of the season.

ACHILLEA, The Pearl. (The Great Cemetery Plant.) A plant will produce hundreds, and even thousands, of flowers the first summer, but when established these will be the thousands per plant, and if continued in the same place, it commences to bloom early in July, and is a perfect mass of beautiful flowers till frost, the same bloom keeping perfect two to three months. Its flowers are large, graceful, and perfect, and produced in large sprays, making it one of the finest cut flowers for bouquets, vases, baskets, etc., or for any kind of decorations. For cemetery planting it is the most valuable of all flowers.

AQUILEGIA (Columbine). Their flowers are spurred, and embrace a wide range in color, white, blue, red and yellow. April to July. 3 to 10 feet.

Each 10c, 3 for 25c

BELLIS, Perennis. (English Daisy). The hardy English Daisy is a favorite as a border plant, especially for edging. Grows 3 to 4 inches high, with double white and rose flowers, 1 to 2 inches across. Season, April to June.

5 each, 6 for 25c, 12 for 45c

COREOPSIS, Lanceolata. (Tick Seed). Each 10c, 3 for 25c.

DELPHINUM (Larkspur). One of the loveliest blue flowers, stalks, erect spikes that overtop the rest of the garden. They are of easy culture, but hardy but preferring sunny, well-drained places. Each 10c, 3 for 25c.

SHASTA DAISY. (A New Variety). Graceful and elegant pure-white flowers with yellow centers, lasts a long time. In bloom from June to October. Extra fine cut flowers, having long, stiff stems. Each 10c, 3 for 25c.

DIANTHUS Plumarius. (Hardy Garden or Pheasant Eye Flower). So much used for edging in old-fashioned gardens, bloom most profusely during May and June. They grow about a foot high, and bear double white and red, double pink, white, 10c each, 3 for 25c.

DIANTHUS Barbatus. (Sweet William). These old-fashioned favorites are border plants. They look well in large clumps. There is a great variety of rich colors, and the flowers are large. They are three-footed and are grown for their very select strain or seed. Double blood-red, red double, pink, white, 10c each, 3 for 25c.

DIANTHUS. Its flowers resemble small carnations. We have both White and Red. 15c each, 2 for 25c.

DIGITALIS (Foxglove). A favorite of the old-fashioned gardener, as it covers the garden when in bloom. Each 10c, 3 for 25c.

FUNKIA (Day Lily). Ornamental and beautiful both in flower and foliage. They delight in damp, mout, shady places. 15c each.

GAILLARDIA (Blanket Flower). Unequaled for rich constant display of bloom from June until fall.

GRANDIFLORA. Flowers very large, bronze-scarlet bordered with yellow. Makes beautiful cut-flowers, lasting a long time in water. 10c each, 3 for 25c.

HOLLYHOCK (Althea Rosenae). Growing 5 to 6 feet tall, these plants produce a pleasing effect planted either in drills or in families. They require a deep, rich soil, and a sunny situation, and will repay for a little extra attention given them. Double red, white, yellow, pink. 15c each.

GERMAN IRIS. No garden is complete without some of these “Flags,” as sometimes called. Foliage is bluish green, broad and luxuriant. Flowers are of various colors from pure white to dark purple, borne on stout, erect stalks, surrounded by clumps of broad, spreading leaves. Some of them are fragrant. Mixed. Each 10c, 3 for 25c.

Named Varieties, each 15c, 2 for 25c.

Mme. Chereau. The prettiest and tallest of all. White, daintily edged with porcelain blue.

Mars. Light yellow. Pale yellow with violet blotches and veins.

Mrs. H. Darwin. White with violet veins.

Charles Dickens. Dark blue, suffused dark purple.

PUMILLA HYBRIDA. Dwarf variety of German Iris, growing about 8 inches high, very free blooming, sweetly scented. These bloom about two weeks before the German Iris.

Cyana. Rich royal purple with black shading.

Florida. Beautiful lemon yellow shaded darker.

Schneekuppe. A large showy pure white. Each 25c.

Old Man. A native plant grown for its delightful fragrant finely cut foliage.

Each 10c, 3 for 25c.

HARDY PHLOX. Named Sorts.

Any of the following Strong Plants, 15c each, 2 for 25c

Athelia. (Tall). Deep salmon rose, very fine.

Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye.

Eclaireur. (Tall). Brilliant rose magenta, with large lighter halo.

Eugene Danzanvillier. (Dwarf). Soft lilac blue with large white centers, blooms freely.

Frau Anton Buchner. The finest white variety yet introduced having the largest truss and individual flower of dwarf habit.

Hermine (Dwarf). 6 to 10 inches, white. Fine for graves.

LeMahdi (Medium). Dark purple violet, one of the finest strong colors.

Mme. Paul Dutrie. (Tall). A delicate lilac-rose, reminding one of some of the beautiful soft pink Orchids.

Mrs. Jenkins. (Tall). The best tall early white for massing.

Obertgarten Witting. (Medium). Bright magenta, with crimson-carmine eye; large flower and truss, one of the best.

Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.

Selma. (Tall). Large flower, pale rose mauve, with carlet-red eye.

Tapis Blanc. (Dwarf). Pure white, immense heads. The sweet dwarf phlox are excellent for the garden, for the fine foliage, green and brown.

Von Hochberg. (Medium). The ideal crimson, the richest of its color.

Von Goethe. (Medium). Pure clear pink with white eye.

PHLOX. (Moss or Mountain Pink)

An early spring-flowering type, with pretty moss-like evergreen foliage, which, during the flowering season, is hidden under the masses of bloom. An excellent plant for the rockery, the border, and invaluable for carpeting the ground or covering gravel.

Each 10c, 3 for 25c.

Sweet Mary. An old-fashioned plant much prized for its fragrant foliage.

15 each

FUNKIA Saxifraga. 8 in., a very pretty little rose or border plant, bearing dainty pink flowers on slender stems. It lives a position in full sun. Most valuable for cemetery planting.

Each 10c, 3 for 25c.

Von Minor or Grave Myrtle. Blue, 4 in. Old garden favorites and valuable for graves and growing under trees. Each 5c, doz. 40c.

Mint, Old fashioned. Aromatic herb of no habit, an old favorite on account of its sweet smelling foliage. Each 10c, 3 for 25c.
BLEEDING HEART

*DieLytra spectabilis*

Once planted where it is to remain, it will come up in spring and make a beautiful plant, with elegant foliage and long drooping racemes of heart-shaped pink and white flowers.

**Large clumps 50c and up.**

**Beautiful Hardy Peonies**

The Peonies are among the noblest and most magnificent of our herbaceous plants. With the addition of superb newer varieties, Peonies have taken rapid strides in popular favor and are now classed as among the most popular of our garden perennials.

The colors have the greatest range, embracing white, flesh color, rose pink, salmon, yellow, scarlet and crimson in lighter and darker shades.

They require very rich soil, are perfectly hardy, and in planting care should be taken to select a rich, sunny place. Avoid planting too deeply, as this is often the cause of shy blooming, two or three inches of soil over the crown (eyes) being sufficient. After planting give a heavy mulching of rotten stable manure, and do not transplant the clumps for at least five years, and then only if very necessary.

We offer double white, pink and red Peonies under color but unnamed for those desiring a reasonably priced Peony. **3 to 5 eye roots, each 35c**

**SELECTED PAEONIES**

**Named Sorts, strong roots, with three to five eyes.**

The fine and newer varieties listed on this page are very desirable and can not fail to please any cultivator. They represent the highest attainment in Peonies and are the best of the originations of expert growers. Do not expect too much of them until well established. These can be furnished in limited quantities only.

- **Berlioz.** Brilliant dark red tinted rose. A fine keeper. Very late. Each 50c.
- **Duchess de Nemours.** A very fine cup-shaped bloom; sulphur-white changing to pure white. Has a fine bud and is particularly beautiful when half open. Each 35c.
- **Edulis Superba.** Bright mauve pink collar mixed with lilac, fragrant, strong upright stem, free bloomer, early, one of the best commercial pinks. Each 35c.
- **Festiva Maxima.** The best known Peony. Flower of immense size. Seven to eight inches in diameter, snow-white, with some red spots on the edges of the center petals. Very sweet, early. Each 50c.
- **Felix Crousse.** One of the best red sorts. Large double ball-shaped flower; a free bloomer. Very desirable. Late mid-season. Each 50c.
- **Humeli.** An old variety but still considered one of the very best late ones. Flower is immense, bending down the strong stems which give the plant a sort of weeping habit; deep rosy pink, shaggy petals. Each 35c.
- **Madame Ducul.** Enormous, globular and compact bloom. Literally packed with petals, which are somewhat incurved like chrysanthemums. A brilliant shade of pink with silvery reflex. Holds its form and color to the end. A magnificent cut-flower variety and wonderfully effective for landscape work. Fragrant, early midseason bloomer. Each 35c.
- **Queen Victoria.** White, center petals tipped carmine, large, full bloom; one of the best cut flower sorts, early. Each 35c.
- **Double Paeonia Officinalis.** This type is the old-fashioned "Peony" and comes into bloom from ten days to two weeks ahead of the other varieties. All are strong growers, with large, full, double, fragrant flowers.

- **Officinalis Rubra.** Brilliant, glowing, bright red crimson. **35c each.**
- **Officinalis Alba.** Blush white. **1 of each for$1.00.**
- **Officinalis Rosa.** Bright rose-pink. **1 of each for$1.00.**
Bulbs for Spring Planting

Bulbs are of easiest culture, inexpensive and require but little care. They are almost certain to grow. Put them in the ground out of doors in April and May. Some will bloom in June, and all during the same year as planted.

Amaryllis.
Excellent for pot culture, in the house in winter, and out of doors in summer.

Johnsonii. Crimson, striped white. Select bulbs, each 25c.

Four Best

Firebird. Green foliage, a clear glistering scarlet.
Yellow King Humbert. A deep rich yellow, heavily spotted, bright red, green foliage.
King Humbert. Dark bronze foliage. A brilliant orange-scarlet, with bright red markings.

One of on.

Hungaria. The best pink Canna. Rose for 60c.

Dahlias.

Double Dahlias.
No garden is complete without some of these large handsome double flowers, so desirable for table decoration. There are several classes, chief of which are the Show Dahlias with very large double flowers. Cactus and Decorative varieties have broader petals, some twisted, some broad and wide. All of them make strong bushy plants which begin to flower early in summer and continue in bloom until cut down by frost. The roots can be dug and stored, in a frost-proof cellar.
The proper time to plant Dahlias differs somewhat owing to the location where they are to be grown. The dry dormant roots should be put into the ground and covered with two or three inches of soil as early as possible after danger from frost is over. From two to three weeks usually elapse after planting before the young shoots appear above the ground.
Dormant, Field Grown Roots.
White, Red, Pink, Yellow and Blended Shades. You can enjoy some fine flowers from these. Each 15c and 20c.

Dahlias, all kinds and colors mixed. Each 10c and 15c.

Cannas.

Selected Named Cannas
In arranging for bedding, the taller varieties should be placed in center.

Dormant Tubers, each 10c, 25c (except King Humbert and Firebird).

Charles Henderson—(Green). Bright rich crimson, an old-time favorite, 3½ feet.
Crimson Bedder—(Green). Dazzling crimson-scarlet, well displayed above the foliage. A conspicuous bedder, 3 feet.
David Harold—(Bronze). Bright vermilion-scarlet, mottled with deep red and with crinkled edged petals. 3 feet.
Florence Vaughan—(Green). Rich golden-yellow, thickly peppered with bright red spots, 3½ feet high.
King Humbert—(Orchid). "King Humbert" is the one ideal Canna. It has flowers six inches across, in trusses of gigantic size; of a brilliant orange-scarlet with bright red markings. The foliage is broad and massive, of a rich coppery bronze; bold and effective, 3½ to 4 feet high.

15c each, $1.25 per dozen.

Madame Croozy—(Green). The popular bright scarlet, with narrow thread-like margin of golden-yellow, 3½ feet.

Pennsylvania—(Orchid). Intense vermilion-scarlet or pure red. The flowers are immense, often seven inches across, 5½ feet, green foliage.

Cannas. All sorts mixed; each 5c, doz. 50c.
We can furnish started plants for bedding out, in season.

New Canna—Firebird.
The best Red-Flowered Green-Leaved Canna
The petals measure and sometimes exceed 2½ inches across, and the color is a glistering scarlet without any streaks or blotches, 3½ feet. Each 25c.

Cinnamon Vine or Chinese Yam.
A climbing plant which in some portions of the country lives over winter out of doors. It grows rapidly, soon covering a large space with its heart-shaped, glossy green foliage. Flowers, white, with the fragrance of cinnamon. Medium size, each 5c, doz. 50c. Extra size, each 10c, 3 for 25c.
GLADIOlus.

Well known flowers which last a long time after being cut. We have carefully selected bulbs so full of life that you cannot do other than be successful with them. They come in all colors, from very light to richest crimson. Set the bulbs six inches apart and three inches deep. Plant from middle of April to first of June. Cut the spikes when the first bloom begins to unfold. Place in water and the buds will expand beautifully and last for several days if water is changed daily.

Gladiolus Best Named Varieties.

Selected from the newest and best varieties of recent introduction including some old favorites.

**America.** Soft flesh pink, lightly tinged with lavender. Full round spike and large flower. Each 6c, doz. 65c.

**Attraction.** Deep, dark, rich crimson, with conspicuous, large, pure white center and throat. At once a most beautiful and attractive sort. Each 7c, doz. 70c.

**Augusta.** Pure white with a tint of lavender in the throat. Each 6c, doz. 60c.

**Baron Hulot.** A deep blue of an indigo shade; an extra fine variety. Each 7c, doz. 70c.

**Breachleyensis.** Vermillion-scarlet, showy. Each 6c, doz. 60c.

**Canary Bird.** One of the best and clearest yellows. Each 8c, doz. 80c.

**Kunderdi Glory.** The ruffled petals give to the flower an odd and original appearance. Color, delicate cream pink, with very attractive crimson stripe in the center of each lower petal. Each 6c, doz. 75c.

**Mrs. Frank Pendleton.** All experts agree that this is one of the finest varieties yet introduced. The flowers are of largest size, borne on strong, straight spikes. In color a lovely salmon-pink with brilliant deep, red blotches in the throat. A color combination rivaling many of the finest Orchids in its richness, exquisite in every way. 10c each, 85c per doz.

**Niagara.** Somewhat resembles America in type. In color the flowers are of a cream shade tinted blush, and splashed with carmine in the throat. Each 8c, doz. 75c.

**Prinsessen.** Rich crimson, with deep shadings in the throat; large white blotches on lower petals. Each 8c, doz. 85c.

Gladiolus in Mixture.

**Challenge Mixed.** Made by ourselves of several varieties, all of the highest types of perfection. This mixture will please the most critical buyer. Each 5c, doz. 50c.

**Superfine Mixed.** This includes varieties that will produce some grand flowers. Each 4c, doz. 40c.

**Fine Mixed.** While offered at a low price, we are sure these bulbs will make a satisfactory showing. Each 5c, doz. 30c.

**HARDY GARDEN LILIES.**

All offered under this head will stand the winter out of doors, it is well to cover the surface of the soil in the fall with straw or leaves for protection. Plant Lily bulbs either in spring or fall. Set them six inches deep in well-drained ground. Early planted bulbs will bloom the same year.

**Auratum.**

The Gold-Banded Japan Lily. One of the finest lilies in cultivation. Large white flowers dotted with crimson, each petal marked through the center with a golden yellow stripe. Each 25c.

**Rubrum.** Its flowers are white, dotted with rose-colored spots. This lily is fragrant. Each 25c.

**Album.** Large fragrant pure white flowers. Each 25c.

**Tigrinum (Single Tiger Lily).** Just the thing for groups in borders or to plant among shrubbery. Flowers orange-red, spotted black. Bloom in July. Each 20c, 3 for 50c.

**Tigrinum fl. pl. (Double Tiger Lily.)** Very large double flowers. 20c each, 3 for 50c.

**LILY OF THE VALLEY**

A well-known and universally admired spring flowering plant; flowers bell-shaped, freely produced and fragrant. To grow in open ground, select a partly shaded rather moist situation. A few clumps will start a bed that with little care affords an abundance of flowers and pleasure.

15c each, large clumps 25c.
MADEIRA VINE.
A beautiful, rapid growing climber with thick, glossy leaves and long, feathery-white fragrant flowers.

Summer Blooming OXALIS.
Useful for form edgings or borders to walks and flower beds. Bulbs planted 2 or 3 inches apart will make rounded, compact plants in a little while, and they will be full of pink and white flowers all summer long. Dozen 15c.

TUBEROSES.
Almost everybody knows the Tuberose with its pure white, waxy, very fragrant flowers. Cultivation same as for Cannas.

Hardy Climbing Vines and Plants

VIRGINIA CREEPER (Ampelopsis Quinquefolia)
Well known. ca. 50c.

BOSTON IVY (Ampelopsis Veitchii)
One of the most desirable climbers for covering walls, as it clings to the smoothest surface, clothing it during the summer with deep green leaves which in autumn change to bright yellow and crimson. Each, 50c and up.

DUTCHMAN'S PIPE (Aristolochia Veilchii)
Chiefly used to form arbors or screens. Has very large heart-shaped leaves. Grows rapidly. Each, $1.00

CLEMATIS, Large-Flowered.
Nothing in the way of vines will compare with the Clematis for covering porches, pillars, trellises, etc. Grown as a single specimen trained to a pillar is perhaps the best manner in which to get the best effect. Imported roots in assorted colors, purple, blue, white, etc., each, $1.00.

CLEMATIS paniculata. White, very fragrant, small flowers in clusters. Each, 50c

HONEYSUCKLES.
For real home vines, to be near you, climbing over your windows and doorways, there is nothing prettier than sweet-scented Honeysuckles. Strong plants in variety. Each, 35c;

Imported, extra large, each, 50c;

WISTARIA, CHINESE.
One of the most elegant climbers. It bears long clusters of blue flowers in May and June. Each, 75c; Extra large plants, each, $1.00.

CLIMBING ROSES.
The following varieties are highly valued for training over arbors, trellises and verandas; also as screens for unsightly objects, such as old buildings, fences, walls, etc. They grow ten to twelve feet high.

Seven Sisters. Pink; blooms in clusters.
Baltimore Belle. Pale blush, rapid grower.
Prairie Queen. Deep rose changing to pink.
Crimson Rambler. The most popular rose in cultivation. An exceedingly vigorous, rapid grower, making shoots ten to twenty feet in height in one season.
Yellow Rambler. Golden yellow flowers.
White Rambler. Pure, pearly white.

Each, 75c and up.
Flowering Bulbs and Shrubs

Roses, Shrub and Hardy Plants

Those who would beautify and decorate their home grounds by planting of trees and shrubs which endure Northern winters will find here a selection suited to the taste of all. The stock is for the most part at least two years old and of the best grade of large field grown plants.

Hybrid Perpetual Roses

These are the Roses which bloom in June and at other intervals during the summer. They are not to be lifted but protected in winter with leaves or litter.

Any of the following, each 75c and up.

American Beauty. Very fragrant, large crimson flowers. Blooms freely throughout the summer.

Frau Karl Druschki. Magnificent brilliant white flowers; immense in size and produced with great freedom.

General Jacqueminot. Brilliant crimson. Fragrant and very hardy. Considered as one of the most desirable roses.

Gruss an Teplitz. Color; scarlet; shading to velvety crimson. Free grower and most profuse bloomer.

Mme. Plantier. Pure white; a favorite for cemetery decoration; very hardy.

Mrs. John Laing. Soft pink, of beautiful form; exceedingly fragrant and remarkably free flowering.

Magna Charta. Deep pink, large sweet scented and of fine form, one of the hardiest roses in cultivation.

Soleil d'Or, or Golden Sun. Varies from orange-yellow to reddish-gold, shaded with Nasturtium-red; large, full, perfectly double flowers; a strong grower.

Ulrich Brunner. Bright cherry-red; flowers large and full; a good strong grower and always does well.

Climbing Roses

As well as Climbing Vines—Boston Ivy, Virginian Creeper, Clematis, Honeysuckles and Wisteria are offered on preceding page.

MOSS ROSES.

Very desirable for culture in open ground as they endure neglect and hardship well.

They are prized for the lovely moss-covered buds. No garden is complete without one or two Moss Roses. Colors, Red and White. Each 75c.

Hybrid Tea Roses—Everblooming Varieties.

These roses are not so hardy as those mentioned above, therefore require more protection during the winter months. They possess a delightful fragrance and beautiful shades of color. Being such fine shrubs during the entire summer which makes them desirable for cut flowers.

Our stock is greenhouse grown and should not be set out until the sun has warmed and dried the ground well.

Each 25c and up.

Hardy Shrubs

By judicious selection it is possible to have shrubs around the home almost constantly in bloom throughout the season.

Almond

The flowering almond is a beautiful shrub, bearing in May, before the leaves appear, an abundance of small, double, roselike flowers. Double Rose or Double White, each 75c and up.

Althea, or Rose of Sharon

Altheas are suitable to grow singly or in clumps and are fine for hedges. In the latter part of summer they bear large double flowers in different colors: Red, White, Deep Violet and Variegated. Each, 75c. and up.

Barberry, Purple-Leaved

Thunbergii or Japanese Barberry. Of very dense growth. Branches are covered with small thorns. Never needs trimming. Foliage turns crimson in the fall. Scarlet berries remain all winter. 18 inches to 2 ft., each 35c; doz., 3.00. 2 to 3 ft., doz., 3.50.

Deutzias

The flowers of the Deutzias are tassel-like and clustered into thick wreaths along their drooping branches. The hardiness of these plants, in connection with the rapid growth, luxuriant foliage and profusion of bloom in June, July and August, makes them deservedly popular.

Crenata fl. pl. Double white, tinged with pink, in racemes four or five inches long. 2 to 3 ft. each 35c; and up.

Forsythia. (Golden Bell)

Deep, glossy green foliage and bright yellow flowers borne on drooping branches. Each, 35c and up.

Ligustrum (Hedge Plants)

Ibota Privet. Hardier than the other varieties. Dark green leaves which remain on most of the Winter. The best for hedge planting, and most desirable for this section. 18 to 24 in. Each 25c dez. 2.50.

Lonicera (Bush Honeysuckle)

Tartarica (rubra). A useful old-fashioned shrub, with slender upright branches. Small, fragrant, pink, crimson or bluish flowers, followed by attractive red or orange-yellow berries. 2 to 3 feet each. Each 35c and up.
A FEW CULTURAL HINTS ABOUT SHRUBS.

There is no cheaper and better way to relieve that dreary bleak and cheerless aspect of your home surroundings than by planting a few shrubs of which there are many varieties. But are not all suitable for the same purpose. Care must be taken in selecting them as to their flowering season, height, and thrift.

In order to be successful, select small healthy and vigorous plants, as young shrubs are much easier to start than old ones. Buy those that show a healthy condition of growth, firm texture of wood and with abundant fibrous roots.

All that is necessary in planting shrubs is to dig up the soil to a depth of one to two feet. Use a liberal supply of cattle manure or other good fertilizers. Level your ground, then dig the holes. Make them large enough to allow plenty of room for the roots.

Place your shrubs well down and spread out all the roots, then fill the black soil around them first. Place enough soil about the shrubs to raise it somewhat higher than elsewhere and press the soil carefully down with the foot.

Do not plant shrubs in the center of a small lawn, it is far better to set them in corners or along the sides in a zig-zag or crescent fashion thereby creating a cozy and homelike appearance.

A succession of bloom may be had for about six months of the year by planting the following varieties: Lilacs, Flowering Almonds; Spirea Van Houtte; Bridal Wreath; Spirea Anthony Waterer, crimson; Hydrangea Paniculata, white; Weigella Eva Rathke, crimson; and Dutzia, Pride of Rochester, white. These are old favorites and always do well.

HYDRANGEA PANICULATA

Tens of thousands of this noble Summer and Autumn-flowering shrub have been sold the past few years, and the demand is now universal. They grow to a height of 8 to 4 feet and are absolutely hardy, grow in any soil and bloom the same year they are set out. They flower abundantly, bearing immense panicles of bloom a foot long, white at first, turning to rose in August, commencing to bloom in August, when very few shrubs are in bloom. To make a fine specimen, the soil should be prepared as for any other shrubs. An annual shortening of branches tends to increase the size of the flowers. When first planted, the branches should be cut back 6 or 8 inches off the main stalk. Each, 50c and up, according to size.
Flowering Bulbs and Shrubs—Continued

LILAC. (Syringa)
Persian Purple. Small glossy leaves that do not mildew. Sweet scented flowers. Each 75c.
Charles X. A strong, rapid growing variety, with large, shining leaves; trusses large, of a reddish purple color.
Each $1.25

PHILADELPHUS. (Mock Orange.)
One of the most satisfactory shrubs for the home grounds. It is a sturdy grower, with handsome dark green foliage and beautiful pure white, fragrant flowers, produced in profusion, blooms in June. Each 35c and up.

SNOBALL (Viburnum)
The common Snowball bears great clusters of white flowers in June. Each, 45c.
Japan Snowball. Grows upright. Foliage handsome, white flowers. Large, each, 35c.

FRUIT TREES
From the large list of varieties of fruit trees the following are recommended for planting in this latitude.

APPLES—Autumn Varieties
Early Harvest. Medium size; pale yellow; tender and sub-acid. Middle to end of August.
Maiden Blush. Large, smooth, with a fine evenly shaded red cheek; flesh white and tender. October.
Red Astrachan. Large, crimson, handsome, rather acid, but good and crisp, profitable. August.
Keswick Codlin. Large, oblong; pale yellow; profuse bearer. August and September.

WINTER VARIETIES
Baldwin. Large; bright red; crisp, juicy, rich. Popular market sort. November to February.
Grimes’ Golden. An apple of highest quality, medium to large size; yellow; productive; grown everywhere. January to April.
Jonathan. Skin yellow, nearly covered with a lively red. November to February. EACH 75c AND UP, ACCORDING TO SIZE

CRAB APPLES
Hyslop. Large, deep crimson, showy and popular. October to January. $0.75
Siberian. Fine golden and amber color. Transcendent. Yellow, with red cheek; juicy; good for cider. October. 75c.

SPIRAEA (Meadow Sweet)
All the Spiraeas are shrubs of easiest culture and rapid growth. They bloom from the middle of May to the end of August. Their flowers are much prized to bring out the full beauty of a bouquet.

Anthony Waterer. A fine, hardy, perpetual-blooming, shrub. Makes nice, round bushes, beginning to bloom almost as soon as planted; rose red flowers in large, round clusters all over the bush. 1 to 1 1/2 ft., bushy. 45c each.
Van Houttei (Bridal Wreath). A splendid garden shrub, entirely hardy, and the most beautiful of all: immense bloomer; pure snow-white flowers. 1 to 1 1/2 ft., each 25c. 2 to 3 ft. each. 35c.

WEIGELIA
Weigelas are shrubs of erect habit while young, but gradually spread and droop as they grow older. Their time of blooming is after the lilacs are gone, and they produce large trumpet-shaped flowers of all shades and colors from pure white to red. We strongly recommend them as good shrubs to set out. Each, 75c and up.

PEARS
Bartlett. Yellow; buttery and melting. Middle to last of September. $1.00
Seckel. Small, skin rich yellowish brown; flesh very fine grained, sweet, juicy, best. $1.00

CHERRIES
Each, $1.00 and up, according to size.

PEACH TREES. Early, medium and late. $0.75
PLUM TREES. Japan or native. 1.25
QUINCE TREES. For preserves. 0.75

SHADE TREES
ASH, white. A favorite tree. $1.50 and up
Catalpa speciosa. Rapid grower. .50 and up
ELM. Unsurpassed for street use. .50 and up
MAPLE, silver leaved. .50 and up
POPLAR, Carolina. A good tree for street planting. Extra large trees. 1.00 and up

GRAPE
They grow readily in most soils but a little extra attention as to the soil, pruning and cultivation they receive will result in a better quality of fruit. No part of the fruit garden yields a richer harvest than the vineyard.

BLACK OR PURPLE GRAPES
Concord. One of the best known grapes. Large clusters of round, black berries; flesh moderately juicy; sweet pulp; quite tender when fully ripe.

RED OR AMBER GRAPES
Bonita. Large handsome bunches of the best quality, berries medium of good flavor. An excellent early grape.

WHITE GRAPES
Diamond. Bunch large and compact, color greenish white with a yellow tinge when fully ripe, doughy, almost without pulp, quality very good, early.
Niagara. Bunch medium, with large berry which is slightly pulpy, tender and sweet, ripens with Concord, probably the most valuable white grape in cultivation.

2 year old vines, each 45c and up, according to size.

SPECIAL NOTE ABOUT MAILING
Seeds and Bulbs will be mailed if purchased. The post rate is one cent for every two ounces, or 8 cents per pound. Remember to send sufficient postage, otherwise we send by express and the buyer pays the transportation charges.

NOTE: This is a continuation of the previous page, covering various shrubs and plants, including lilacs, snowballs, apple and pear varieties, weigelas, and various types of fruit trees and grape varieties. The document is a comprehensive guide for gardeners, providing detailed information on planting, care, and growth of these plants. The text includes specific varieties and their characteristics, as well as recommendations for their use in gardens. The final section notes the availability of mail orders for these plants and the rates for postage. This information is essential for anyone looking to expand their garden or add new plants, ensuring they have the necessary knowledge to do so successfully.
Choice Selection of Small Fruits

Avoiding the long lists of varieties which tend only to confuse the inexperienced planter we offer a selected list of the several sorts we know will give satisfaction.

CURRANTS

Currants are perfectly hardy and may be planted in spring or fall. They succeed well in a cool, moist soil, and should be planted about 3 ft. apart and well cultivated. The currant worm can be controlled by applications of Slug Shot and the old non-productive wood should be kept pruned out. Heavy 2-year-old plants, each 50c and up, according to size and variety.

**Black Champion.** Produces large crops of excellent fruit.

**Perfection.** Fruit of the largest size, deep red, rather acid, short bunches, strong erect grower.

**North Star.** Red, hardy, good quality, bush is a strong grower.

**White Grape.** Very large, yellowish-white sweet currant, excellent quality, valuable for the table, finest of the white varieties.

RASPBERRIES

Plant 3 feet apart in a row and keep vines growing in good condition. Old wood must be cut away as soon as it has fruited to give vigor to young canes.

**Cuthbert.** Large, dark red variety, producing large crops of large conical deep berries which are sweet, high flavored, a certain cropper, season, medium to late.

**Gregg.** A very showy berry, one of the best and largest black caps. These Raspberries can only be planted in the spring and the young canes should be pinched back when about 2 ft. high to keep the bushes snug and compact. 3 canes for 25c, doz. 90c.

BLACKBERRIES

For garden culture, plant 2 feet apart in rows 3 feet apart. Pinch back canes when 4 feet high and allow three canes to hill.

**Early Harvest.** A very early productive variety with sweet medium sized berries, two weeks earlier than the Snyder.

**Snyder.** A hardy, well-known variety, berries of medium size, sweet and melting, producing in profusion, early.

GOOSEBERRIES

This fruit is so useful for cooking when green or ripe, and may be canned with such facility, that it is beginning to be cultivated very extensively for both home and market use. It requires the same cultivation and treatment for worms as the currants.

**Downing.** Whitish green, vigorous and prolific, of splendid quality for desserts or cooking, fine for general culture.

**Houghton.** Medium pale red berries, tender and good, very productive and vigorous.

**Red Jacket (Josselyn).** Large smooth berries of good flavor, fruit bright red. The best large variety to plant. 2 year old bushes, each 35c and up, according to size.

STRAWBERRIES

Early spring is the best time for setting out. The plants are set 12 in. apart in rows, 18 inches between rows. At the end of the season they will have formed narrow rows of plants. This system will produce more and better berries than where the rows are thickly matted together. A mulch of leaves or straw is to be applied after the ground freezes in winter; the covering should be removed before growth starts in the spring. Doz. 20c, 50 75c, 100 $1.25.

**Brandywine.** Berries very large, broadly heart-shaped, bright red in the center, firm flesh, a fine flavor, a late berry.

**Senator Dunlap.** One of the best flavored berries, fruit of good size, regular form, beautiful bright red, firm, splendid keeper, one of the best for canning, ripens early.

**William Belt.** Berries large, conical, rather long, bright red, glossy, quality good, moderately firm, plants vigorous, healthy and quite prolific.

SHREDDED CATTLE MANURE FOR ROSE BUSHES, 5 LBS. 25c, 10 LBS. 45c
Flower Pots, Saucers, Pans, Hanging Baskets and Vases

A pleasing and useful article often used on lawns and in cemeteries where the rules forbid the use of glass vases. Made of heavy tin sheeting, enameled in white and green, making an attractive vase for this purpose.

Height 6¼ in., Diameter 4¼ in., each 25c

**NOTE**—Above Prices are Subject to Market Changes.

**Fall-Bearing Strawberries**

*Fall-Bearing Strawberries* seem to be no longer an experiment, they are becoming essential all over the country, and are making good every place they have been tested. If these varieties are disbudded, until say August 15th to September 1st, and allowed to fruit, they will give large quantities of ripe berries until checked by hard freezing. The two varieties we offer we consider the best.

**Americus.** This is the most wonderful everbearing Strawberry ever produced. It outdoes its parents both in large size and wonderful productive ness. Plants are strong, healthy and deep rooters. The fruit is medium to large in size, very firm, uniform shape, bright red, and has the native Strawberry flavor.

**Progressive.** This is the strongest growing plant of all the fall bearing varieties we have seen. The plants are very large and heavily rooted, producing a phenomenal crop of medium to large fruits, of a dark red color both inside and out. The young plants are produced in good quantities.

*Price per doz., 10c: 25 for 75c: 50 for $1.25; 100 for $2.00.*

**Flowering Bedding Plants**

We carry in season seedling plants of pansies, asters and daisies. Also geraniums and other pot grown blooming plants.
